Issue 10 - December 1999

Hawk Clean and Coat is a division of  **MONITOR**
DISTRIBUTORS

Christmas Greetings

The management and staff at Monitor Distributors would like to take this opportunity to wish you and your staff the very best festive season. We would like to thank all our friends for a wonderfully prosperous year and look forward to even better times ahead. With an ever strengthening economy and many exciting new developments planned for 2000 we are expecting the new millennium to be even brighter.

The Christmas Party

The 1999 Christmas party went off with a bang on 1 December. It was held at the Point Yacht Club and great fun was had by all.

Staff Profile

As the Internal Sales Director Doc is a key member of the Monitor organisation. Having been with the company for more than 20 years his wealth of experience in all aspects of our industry is invaluable. His ability to provide solutions to his customers and warm friendly personality make him a great asset to the company.

Product in Focus

High Pressure Nozzles

Left and right: Spraying Systems Meg Nozzle
Middle: Hawk Cermaic Nozzle

This month we are taking a look at three different makes of high pressure nozzles. Two of them are distributed by Hawk. The Spraying Systems MEG nozzle has been the industry standard for many years and now the new Hawk ceramic jet.

The MEG nozzles are made from specially hardened stainless steel and have a patented "figure-of-eight" fitted into the back to prevent swirling - the impact of the jet is better when the spray has clean edges. The difference in spray quality is clearly visible in the photo

comparing them with an opposition nozzle. The material of the MEGs is also far superior to the opposition and actual comparative wear tests are available on request. The MEGs last many times longer!

The new nozzle has an extremely hard ceramic insert in the front to extend it's life. The price will be exactly the same as for the MEG nozzle. The price of the replacement inserts still have to be established.

Please contact us for a free test sample. They should be in stock in January.
