

What's New

1999 KwaZulu Natal Industrial Trade Show

The 1999 KwaZulu Natal Industrial Trade Show, took place from 1 - 4 June, and Monitor was there. On show was the Hawk Clean 'n Coat range of high pressure cleaners and spray painting equipment. The highlight of the show was the Hawk 211 PRM which is the road marking version of the 211 airless spray painting range. The product that generated the

most interest however was the Whirl-A-Way roof and surface cleaner. The Whirl-A-Way is a new product in the Hawk range and is designed to work with your high pressure cleaner to provide more effective cleaning solutions for corrugated roofing, paving stone and tiles. For more information check out this month's "Product in Focus".

Hawk hits cyberspace at cleanandcoat.co.za

Monitor goes online with the introduction of the Hawk Clean 'n Coat web site. visitors can see all the latest equipment and accessories. The latest issue of

"Clean 'n Coat News" is also available including back issues. The site can be visited at www.cleanandcoat.co.za.

Food for thought

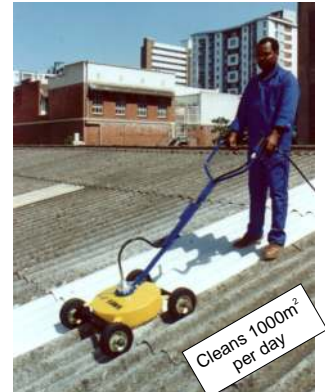

Would You Swap Places ?

I am the officer
 I have been where you fear to be
 I have seen what you fear to see
 I have done what you fear to do
 All these things I have done for you
 I am the person you lean upon
 The one you cast your scorn upon
 The one you bring your troubles to
 All these people I have been for you
 The one you ask to stand apart
 The one you feel should have no heart
 The one you call "in blue"
 But I am a person, just like you
 And through the years I have come to see
 That I am not always what you ask of me
 So take this badge, take this gun
 Will you take it? ... Will anyone?
 And when you watch a person die
 And hear a battered baby cry
 Then do you think that you can be
 all these things you ask of me?

Product in Focus

Whirl-A-Way Roof and Surface Cleaner

The new Whirl-A-Way cleaning system converts your standard Hawk high pressure cleaner into an effective roof and surface cleaning machine. With the specially developed corrugated roof cleaning option areas of 1000m² can be cleaned per day, saving man hours and money. The other options include a general surface cleaning model which is fitted with castor wheels making it extremely easy to move around and light on the operator. A brush fitted option is also available for areas where wheels are not practical. The system is powered entirely by the high pressure water from your Hawk high pressure cleaner and does not require any addition power or water supply. The unit consists of two rotating flat or solid stream nozzles attached to two arms that rotate at very high speed to cover the entire area under the protective

Cleans 1000m² per day

cover. The units are capable of pressures up to 300bar, which means they can be attached to most high pressure cleaners.
