

# Clean and coat news

Head Office: 336 Sydney Road, Durban 4001, Phone (031) 205-4313, Fax (031) 205-4332 Branch: 98 Newton Road, Germiston, 1401, Phone (011) 974-4662, Fax (011) 392-5942

Issue 18 - August 2000

Hawk Clean and Coat is a division of MONITOR DISTRIBUTORS

## What's New

### The Hose Tote

A new addition has been made to the wall mounted, Hawk live hose reel. The hose tote is now mounted onto a trolley so that it can be moved around easily.

Like the fixed hose reel, the hose tote is made of a high grade stainless steel, which is extremely robust and resistant to corrosion. It is designed to hold 10-30m of high pressure hose, and can handle pressures of up to 200 bar. Being a live hose reel, the hose can also be retracted while the system is in operation. The high pressure hose will never be damaged again, because it can be easily stored on the tote, this increases its life significantly. The unit will retail for R1600.00 + VAT.

### The New Total Stop Unit

The new Total Stop Unit will replace starters of up to 11Kw and with two pressure switches fitted it will allow the unit to be switched off by merely closing the gun.

By closing the gun, which the pressure switch can sense, the total stop unit allows the machine to run for a further short period. If the gun has not been re-opened during that period, the motor will switch itself off. When the gun is opened again, the machine will

immediately start up remotely. The first delivery of these units will be received in mid August for testing.

## Meet Our Staff

Julian Peel has been working at Hawk since 1996. Originally a sales representative in the Durban Head Office, he then moved to Johannesburg, where he is now the branch manager. He has a broad knowledge of the whole product range, and can answer any queries his customers may have.

## Product In Focus

### Three of a Six-Unit-Order Already Delivered

We have recently delivered three high pressure cleaners mounted in cabinets, they are used in the workshops of a heavy construction company

The unit is powered by an HC950 hawk pump, delivering 30 litres per minute. Two guns supply 15L/min each at 200 bar.

### The Hawk Cam Lock Coupler

The standard Cam Lock Coupler is made of fibreglass-reinforced polypropylene, with stainless steel locking levers for maximum mechanical strength and corrosion resistance. They are now available from 1/2" to 3" with male and female threads, as well as hose information on the different barbs. For more technical models see the back page.

## Humour

*"Never forget that not taking a step forward is taking a step backwards."*

# Hawk Cam Lock Couplers

- Suitable to couplings MIL-C-27487
- Stainless steel locking levers for maximum mechanical strength and corrosion resistance.
- The material used, fibreglass-reinforced polypropylene, ensures excellent mechanical strength and good resistance against chemical agents.
- On request, also available in fibreglass reinforced Nylon BSP Threads 9NPT on request)
- A tapered seat for the o-ring seal is fitted in the female thread BSP version.
- Max working pressure 9 bar (130 psi) for the 1/2" to 2" models; max 5 bar (75 psi) for the 3" models.
- EPDM standard gaskets (Viton and NBR on request)
