Issue 17 - July 2000

Hawk Clean and Coat is a division of 

What's New

The new Hawk Hot Box

An exciting new design has been used for the locally manufactured high pressure water heater.

The stainless steel sides clip off for easy access to the boiler and burner. The chassis, ends and top plates are super strong, being made from 2mm thick steel. Connected to a normal cold water unit, the hot box provides high pressure hot water to remove heavy grease and dirt. Local manufacture of the hot box keeps the price

Cleantex 2000

This year's Cleantex trade exhibition kicked off on the 7th of June 2000. The four day show was particularly successful, and attracted many visitors.

High pressure cleaners, airless spray painting units, Hudson compression sprayers, the new range of Hawk drain and tube

cleaning nozzles and the new Hawk Hot Box, were all on display. The Hawk Whirlaway roof and surface cleaning system attracted particular interest from visitors, as did the range of stainless steel Hudson compression sprayers.

Hawk received the Topaz Award for the best large stand of the show.

In Memorium

Leonard Mkhize, passed away peacefully on the 17th June this year. He was an integral member of the Hawk team for the past 28 years, and will be sorely missed.

Product In Focus

The Hudson X-Pert Sprayer

Hudson has a 50 year history of proven durability and quality. The X-Pert is the only pump to comply with the performance guidelines of the World Health Organization.

The units are engineered and built to meet the precise and standardized application procedures used in residual peptide application.

The X-Pert has a reputation for trouble-free performance. The availability of spare parts is guaranteed. This assures optimum cost, with less down time and less maintenance costs.

This special offer applies to the 15.14 Liter (model 674422A) sprayer.

The "Captain Crime Stop" Initiative

The "Captain Crime Stop Yo-yo Campaign", is a police initiative aimed at building cordial relationships between children and police officers. Organisations such as Hawk have been approached to help in this regard, by donating yo-yo's.

Many schools around South Africa have allowed the SAPS to distribute the yo-yo's to their students. According to police

statistics, children in the pre-primary and primary schools should be targeted for this type of programme. Older children have already built up bad opinions of policemen.

Hawk is proud to be involved with the SAPS in their campaign, and have donated 1000 yo-yo's.

Humour

Practical Jokes of the Wild

"When faced with a problem- adopt the attitude that you can, and will, succeed in solving it."

hudson vim

The new Hudson Vim sprayer is durable and versatile. The light weight poly-ethelene tank and corrosion resistant supply tube make the unit resistant to most chemicals. Another advantage in the field is that you require no tools to service the unit. An adjustable nozzle allows you to dispense a fine mist or a solid stream jet. A built in pressure relief valve protects the unit from being damaged from over pressurising and is also convenient for quickly releasing the pressure.

hudson ProULV

The Electric Pro-ULV sprayer for professionals, unlike thermal foggers, atomises so well that it reduces particle size without degrading heat sensitive chemicals. The unit is designed specifically to apply chemicals in an ultra fine mist with precise output control. It is effective in controlling the usage of expensive chemicals, especially concentrated chemicals. The Pro-ULV is ideal for use with a wide variety of chemicals such as insecticides, disinfectants, germicides etc. It is perfect for use in industrial, agricultural, sanitation and pest control.
