

What's New

Bird Avery Sprayer.

The bird avery sprayer is used to apply disinfectants to sanitise the avery's. This unit is fully portable and is mounted on a stainless steel frame, it has a 20 meter outlet fluid hose along with 10 liters of 220 Volt electric cable, the unit also includes its own chemical container. The unit operates at a pressure of 4 bar with a maximum volume displacement of 1.1 liters per minute. All components used in the units manufacture are corrosion resistant.

Argus Cycle Race

The Argus Cycle Race was held in Cape Town on the 11th March. Once again Monitor teamed up with 5fm and set up a mist tunnel on the top of Wynberg hill to cool down the cyclists. Congratulations to all of the cyclists to rode and completed the tough race.

The day was a success and enjoyed by all.

Meet Our Staff

Pam has been working at Monitor since August 2000. Not only is she the first voice that you hear when you phone our Durban branch but she also handles all the creditors invoicing.

Product in Focus

P500 Spray Painting Gun

The Hawk P500 Airless spray gun has over the past few years proved itself to be a reliable and cost effective gun for spraying just about any material. The casing is constructed from anodised aluminium and all the wetted parts are stainless steel, this means it is suitable for more environmentally friendly water based paints and the more aggressive solvent based materials. The gun is supplied as standard equipment on the Hawk 211 range of airless spray painting machine, however with a maximum pressure rating of 500 bar it can be used on just about any airless machine. The gun currently retails at an economical R1050.00 +VAT. Hawk is also offering a further R250.00 trade-in discount for any airless spray gun, regardless of it's condition.

Humour

"I tell you, a crib is just plain worthless - what we need around here is a good cardboard box."

"Sometimes inferiority is simply the lack of information"

RA021

Rotating tank cleaning head

The RA021 is designed for rinsing medium to large tanks or tanker trucks. It can handle a maximum volume of 200l/min and a maximum pressure of 100 bar. The RA makes use of an innovative turbine rotating method which means it is completely self rotating and does not require any motor. It makes use of the water pressure to generate its' rotation.
