

What's New

Phase Protection / Under Voltage Unit.

The Phase Protection / Under Voltage unit is an optional extra that is now available to protect your high pressure unit from fluctuating power supply. If 3 phases are connected in the right sequence, this unit will detect incoming power variation within 15% of 380volt. The LED will come on,

indicating a healthy power supply running through your machine. If the voltage varies by more than 15% or if one phase fails, the contact will not be held in and the motor will cut out. Thus protecting your unit against power spikes

A fault delay of 180 seconds is enabled by connecting a link between Pins 8 and 9

Robust, Inexpensive Drum Cleaning Nozzle

This nozzle was originally designed for mixing wettable powder, as they are poured into agricultural spraying tanks. These nozzles are finding more applications in industrial tank and drum cleaning situations. They work at pressures of up to 10 bar and deliver high impact over either a 270° pattern or a 360° pattern. There are no bearings to worry about wearing out and are manufactured from stainless steel. An optional valve can be fitted in such a way that when a drum is placed over a nozzle it will start to spray automatically, and shut off quickly when the drum is removed.

Meet Our Staff

Robbie has been an employee of Monitor since February 1989. He is quiet, well liked, with a dry sense of humour. He is an important member of the workshop team. His duties include welding and manufacturing.

“Youth, quick of temperament, weak of judgement”

Product in Focus

ES1 Quick Pump Primer

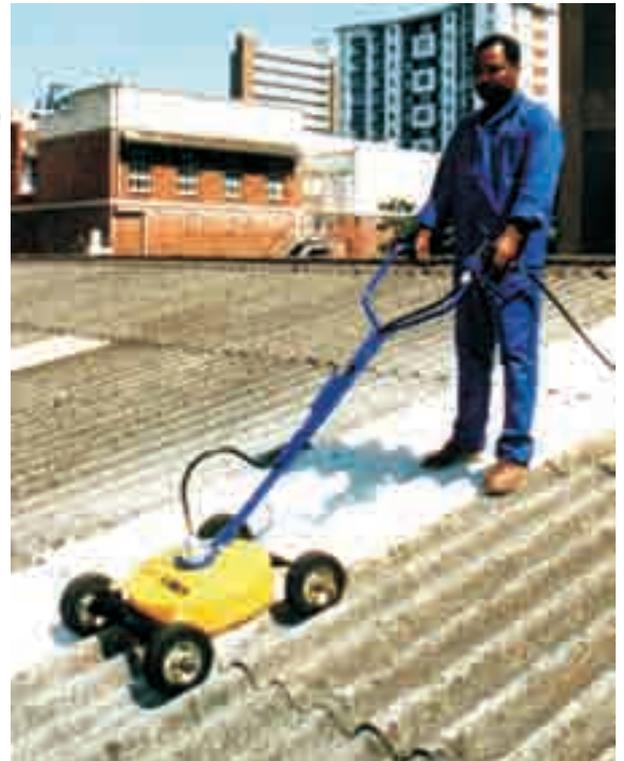

The handy new ES1 easy start system is now available in the Hawk range of high pressure accessories. The fitting is designed to connect on the outlet of your high pressure piston pump. It allows all the air in the pump line to escape easily so that the pump can prime quickly. The system helps reduce dry starts for piston pumps and thereby reduces wear on the seals. For only R136.50 this attachment can save you a fortune in damaged seals.

Versatile, durable and affordable roof & surface cleaning solutions

Technical Data

Part No.	Configuration	Max. Bar	Max. L/min	Coverage
WAW1600F	Handles & castors	300	23	16"
WAW1800F	Handles & castors	300	23	18"
WAW2400F	Handles & castors	300	23	24"
WAW1800R	Handles & large wheels	300	23	18"
WAW1800RNB	No Handles & large wheels	300	23	24"

Clean 1000m² Per Day

The new Whirl-A-Way cleaning system converts your standard Hawk high pressure cleaner into an effective roof and surface cleaning machine. The other options include a general surface cleaning model which is fitted with castor wheels making it extremely easy to move around and light on the operator. A brush fitted option is also available for areas where wheels are not practical. The units are capable of pressures up to 300 bar, which means they can be attached to most high pressure cleaners.

Unique Rotating Arms

The unit consists of two rotating flat or solid stream nozzles attached to two arms that rotate at very high speed to cover the entire area under the protective cover.

Special Roof Cleaning Option

With the specially developed corrugated roof cleaning option areas of 1000m² can be cleaned per day, saving man hours and money. The system is powered entirely by the high pressure water from your Hawk high pressure cleaner and does not require any addition power or water supply.

Powered by your Hawk High Pressure Cleaner

The system is powered entirely by the high pressure water from your Hawk high pressure cleaner and does not require any addition power or water supply.

Unique Guarantee

Precision engineering and the use of high quality materials have enabled Hawk in South Africa to give a comprehensive Guarantee to cover their products. A full one year's warranty covers the workmanship and materials against defects, while they are also covered by a unique spares guarantee. Should the required Hawk pump or accessory spare part not be available within 24 hours because of a out-of-stock situation, they will be airfreighted from the factory, and fitted, free of charge.
