Issue 37 - March 2002

Hawk Clean and Coat is a division of  **MONITOR**
DISTRIBUTORS

What's New

Mini Spray Trailer

Hawk recently developed a new product for a local application. The mini trailer was designed and manufactured in Durban for towing behind a mini tractor or "ride-on" lawnmower. It is filled with whatever chemical needs to be sprayed and then towed behind the "ride-on" while the lawn is being cut or without the mower operating. The tank can also be removed and replaced with a refuse box for collecting garden refuse or transporting goods. The mini trailer is an excellent example of Hawk's ability to provide spraying solutions for any application. Tell us your problem and we'll solve it.

KZNPI Exhibition Centre

The KwaZulu Natal Poultry Institute recently launched a display area at their offices and training centre just outside Pietermaritzburg. The Institute offers course for people involved in the chicken industry throughout Africa. Hawk's presence represents its involvement in the chicken industry, supplying high pressure cleaning equipment, sanitising units, foaming and disinfecting systems and evaporative cooling systems.

Staff

Danie has just joined Monitor as our workshop manager. He has already managed to get things running smoothly and efficiently. As a hands-on person and from a good mechanical background, he will certainly make his presence felt.

Product in Focus

Inexpensive Live Stainless Steel Hose Reel

The Hawk stainless steel live hose reel is designed for wall, floor or machine mounting. It is ideal for fixed installations such as wash bays and static cleaning systems. The frame is constructed of high grade stainless steel to be extremely robust and corrosion resistant. It is designed to hold 10-30m of high pressure hose and can handle over 200 bar. Being a live hose reel, the hose can be retracted while the system is in operation. By not having your hose lying around, being damaged by heavy equipment or passing traffic, it's life can be significantly increased. The wall mounted version retails for R 1430.00+VAT and the trolley version for R 1760.00+VAT

Humour

"Raised the ol' girl from a cub, I did..." "course, we had to get a few things straight between us. She don't try to follow me into town anymore, and I don't try to take her food bowl away 'til she's done."

"Nothing seems fair when it is contrary to my desire."

Versatile, durable and affordable spray painting solutions

**HAWK
6500**

Affordable Power

Hawk 6500 spray painting machines are a versatile, durable and cost effective way of applying just about any material in just about situation. It is perfect for coating large areas quickly and quietly while giving excellent coverage, saving both time and money. Petrol and 220 volt electric versions are available and both are supplied ready-to-run on a corrosion resistant stainless steel chassis. The unit includes 10m of high pressure hose, airless gun, tip and suction system. The 220 volt electric unit comes with 6m electric cable and a 220 volt plug.
