

What's New

New Sport Line Marker

Several improvements have been made to the new Sporty Linemarker. The design changes have been made in consultation with existing users and they have been primarily to improve the stability and ergonomic design of the unit. The wheel base has been made wider giving stability and the handle bars have been raised and widened so as to make it more comfortable to push. From now on the Sporty will be supplied with inflatable wheels.

The Sporty is designed for marking sports fields quickly and efficiently.

Visit us at Cleantex 2002

This year we will once again be displaying the Hawk range of equipment at the cleantex Show. The show will be held at the Gallagher Estate in Johannesburg from the 5th to the 7th of June 2002. We have enclosed two complimentary tickets, so please feel free to come and visit us on stand C10. Should you require some more rickets please do not hesitate to contact us.

Staff

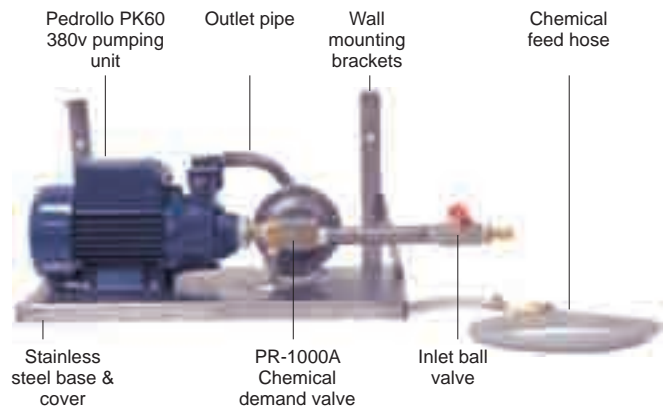

Cammy has been an employee of Monitor Distributors since 23 October 1996. He is responsible for the assembly of our new machines. With out Cammy in our workshop it would not be half as efficient as it currently is.

Product in Focus

Sanitizing System

The Hawk Sanitiser is ideal wherever sanitising of vehicles or work areas has to be carried out by chemical means. The PR1000A chemical demand valve keeps a 5 inch vacuum on the pump inlet, regardless of the incoming water pressure. This allows chemical to be sucked into the system in an accurately metered way. The unit was originally designed to apply disinfectant to trucks entering a chicken farm. This is done so the vehicles don't carry any bugs into the area that may be harmful to the birds. The unit is inexpensive and reliable. It can be mounted on a wall, be connected to water mains, and has a lockable stainless steel cover.

Humour

"We've still got a couple of years to go before we're ready for the moon"

"Man's mind, once stretched by a new idea, never regains its original dimensions"

**Versatile, durable and affordable
hose reel solutions**

Wall Mounted Unit

Trolley Mounted Unit

Chemical Trolley Unit

The Hawk stainless steel live hose reel is designed for wall, floor or machine mounting. It is ideal for fixed installations such as wash bays and static cleaning systems. The frame is constructed of high grade stainless steel to be extremely robust and corrosion resistant. It is designed to hold 10-30m of high pressure hose and can handle 200 bar +. Being a live hose reel, the hose can be retracted while the system is in operation. By not having your hose lying around, being damaged by heavy equipment or passing traffic, it's life can be significantly increased.
