Issue 45 - November 2002

Hawk Clean and Coat is a division of MONITOR DISTRIBUTORS

What's New

Mobile Cleaning Power

Hawk was recently asked to develop a mobile cleaning unit that could be completely independent of water and power supplies. The result is a unit that includes a 2,5 ton braked trailer with a 2000L water tank and a diesel powered Hawk high pressure cleaning unit. It is ideal for cleaning applications in remote areas or as a fire fighting unit. The entire trailer unit was designed and manufactured in our Durban workshops making it a very reasonably priced option.

Hawk Carwash System

The new Hawk carwash system is now available. Several versions are manufactured to suite any carwash from smaller operations to large truck washing installations. Options include coin, token or switch operation, chemical injection for foaming or wash and wax, overhead booms and vacuum systems. The units are supplied in robust stainless steel cabinets and can be customised to suite any installation.

Staff

Devi Reddy has been working at Monitor since 1984. She was the first person to be employed after the business was purchased from Ted Woodward.

Devi knows the business from a grass roots level. She is responsible for processing all the debtors invoices.

Product in Focus

Sporty Sports Field Marker

The "Sporty" is the next generation in line marking solutions for sports fields. It's ease of use and durability make it a clear winner when it comes to marking clean straight lines on sports fields. The "Sporty" is perfect for schools, sports clubs, and municipalities for applying line marking paint quickly and with the minimum of effort. The tank is pressurised using the easy hand pump and the material is then applied at pressure through the nozzle. The width of the line can also easily be adjusted with the slide rail. The durable all-viton equipped polythene compression tank is used to pressurise the paint.

3. Paint

Humour

"For crying out loud, I was hibernating!...Don't you guys ever take a pulse?"

"A man's reach should exceed his grasp."

Versatile, durable and affordable
line-marking solutions

HAWK
4200PRM

Technical Data

Model:	Hawk4200PRM
Motor:	5.5 Hp
Fuel:	Petrol
Max Operating Pressure:	200 Bar
Max Volume at 120 Bar:	4.0 L/min
Max Tip Size:	0.021"

Detachable Spray Gun

The Hawk 4200PRM has been improved with the development of a new three wheel chassis, making it easier to manoeuvre and cheaper than its predecessor. It has a single lockable swivel wheel at the rear, it is light, which makes line marking up hill much easier. The unit is perfect for marking roads, sports fields, garages, schools, parking lots or factories. It is suitable for high viscosity marking paints and is easy to use, affordable and durable.

The Hawk 4200 road marker can also be used for conventional spray painting, by simply detaching the gun from the line-marker

holder. It can then be used for stencil work or any other coating application.
