Issue 64 - November 2003

Hawk Clean and Coat is a division of  **MONITOR**

Hawk exhibited this month on the 22nd World Road Congress held at the ICC in Durban. The week long congress was attended by 2800 delegates from all over the world. With the focus on road construction, management and maintenance Hawk displayed the 4200 petrol road marking machine, high pressure cleaning equipment and airless spray painting units.

Carwash Unit

High Pressure Centrifugal Pump

The new Hawk carwash system is now available. Several versions are manufactured to suite any carwash from smaller operations to large truck washing installations. Options include coin, token or switch operation, chemical injection for foaming or wash and wax, overhead booms and vacuum systems. The units are supplied in robust stainless steel cabinets or on mobile trolleys and can be customised to suite any installation.

The EV-10/16 centrifugal pump, because of it's ability to pump at high pressure, is suitable for fogging and evaporative cooling systems. It is recommended for pumping clean water and chemically non-aggressive fluids at volumes of up to 50 L/min at 5 bar and 16 bar pressure at 10 l/min. Peripheral pumps key advantages over piston pumps include longer life, cheaper price and a quicker line priming time. A thermal overload cut-out in the winding helps reduce voltage overload.

John Veitch is our Stores Manager, he has been keeping watch over our stores since April 1994.

With vast knowledge and experience, he ensures that the Stores are kept running smoothly and efficiently.

3/40-140	HC980	11kW	380V	40	140	Large

** The 3/20-200 is supplied on a Affordable Power

The Hawk high pressure cleaner range is capable of delivering pressures up to 300 bar and volumes up to 40 litres per minute. This makes them extremely versatile in their application. By simply adding accessories you can convert your machine into a roof cleaner, sandblaster, drain cleaner or tank cleaner. At the heart of the system is the Hawk piston pump. Hawk high pressure pumps have proved themselves around the world. They are reliable, easy to use, easy to repair, and inexpensive. The plungers are ceramic and seals are self-lubricating.

larger two wheel barrow type Unique Guarantee

Precision engineering and the use of high quality materials have enabled Hawk in South Africa to give a comprehensive Guarantee to cover their products. A full one year's warranty covers the workmanship and materials against defects, while they are also covered by a unique spares guarantee. Should the required Hawk pump or accessory spare part not be available within 24 hours because of a out-of-stock situation, they will be airfreighted from the factory, and fitted, free of charge.
