Issue 72 - August 2004

Hawk Clean and Coat is a division of  **MONITOR**

Bakkie mounted sprayer.

This is one of a batch of eleven bakkie mounted, petrol driven sprayers, nine of which were for one customer. These units fit into a standard bakki and can be used for fire fighting or for chemical spraying. The tank holds five hundred litres of water and the hose is wound onto a live hose reel.

Electra Mining 2004

Small stainless steel rotary-vane pump.

A new range of stainless steel positive displacement pumps are now available. This model delivers 100 l/hr at 2 bar and 70 l/hr at 14 bar. It has a built in pressure relief valve and is mounted on a 220V motor. (Refer back page)

Shereen Garnham

Shereen Garnham

Shereen, who has been producing the Hawk Newsletter and has worked in our marketing department for some time, has, like so many young South Africans, decided to work in England. We wish her all the best and hope that she has the fun she expects.

Pamela, who worked in our creditors department, and was our receptionist, has taken her place.

"Eagles may soar, but weasels don't get sucked into jet engines."

These pumps can be supplied as bare pumps or with motors. (The flow rates are litres per hour.)
