Issue 71 - July 2004

Hawk Clean and Coat is a division of  **MONITOR**

Decelerator for petrol unit

It is possible to fit a decelerator to a petrol unit. This helps to save fuel and gives both the pump and motor longer life expectancies. When the pump is under pressure the decelerator pulls a cable which opens the throttle resulting in the engine running faster at full power. When the gun is closed and there is no pressure on the head of the pump, the engine goes back to idle.

Visit us at Cleantex 2004

When we will be exhibiting at this years Cleantex show, on the 18th to 20th July at Gallagher Estate in Johannesburg, we will be displaying a wide range of products including high pressure cleaning equipment, airless spraypainting machines and pest control equipment. If you need complimentary tickets please contact Shereen or Pam at 031-2054313.

Hawk Hot Water Machines

To fill a small niche in the market, we have ordered some hot water units from our regular boiler supplier. They run on 220 volts, and will be available in South Africa before the end of August.

Pressure: 100 bar
L/min: 7 l/min
Temperature: 75 °C
kW: 1,6 kW
Weight: 70 kg

Russell Mcquilkie

Russell Mcquilkie is the new man on the job. He will be handling the repairs. With a background in repairs he has already proven himself as a great asset to the company.

"Things should be as simple as possible, but not any simpler."

Superior pumps for difficult applications

Models available

- C Series - From 34 L/min at 280 bar to 72 L/min at 110 bar
- EC Series - From 105 L/min at 150 bar to 163 L/min at 90 bar
- ECH Series - From 26 L/min at 500 bar to 64 L/min at 180 bar
- EL Series - From 84 L/min at 190 bar to 164 L/min at 90 bar
- G Series - From 108 L/min at 300 bar to 267 L/min at 120 bar
- SL Series - From 135 L/min at 300 bar to 316 L/min at 130 bar

Also available with gearboxes for 1500 RPM and 1800 RPM drives

Custom Design

Hawk can custom design units to suit particular requirements.
