

500 bar high pressure plunger pumps

The revolutionary new, 5 piston, 500 bar pumps are now available. The five pistons cause less pulsation and deliver a flow rate of 27 l/min. A three piston version is also available at 500 bar with deliveries of either 12 l/min using an 11Kw motor or 16 l/min with a 15Kw motor.

Electra Mining Show

This years Electra Mining Show kicked off on the 6th of September 2004. The five day show was very successful and attracted many visitors. High pressure pumps, particularly the new 500 bar pumps and the large volume HPP pumps were all on display. Seeing so many of our regular customers in one place was the best part. It was interesting to see so many foreigners, especially those from places like Russia.

Hawk Sanitiser

The Hawk Sanitiser is designed to sanitise vehicles or work areas by application of chemicals. The PR1000A chemical demand valve keeps a 5 inch vacuum on the pump inlet, regardless of the incoming water pressure. This allows chemical to be sucked into the system in an accurately metered way.

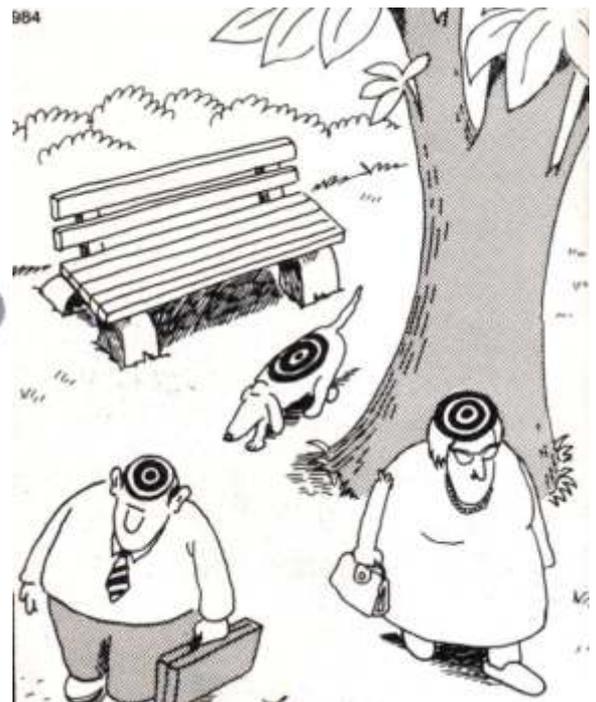

The unit is inexpensive and reliable. It can be mounted on a wall or a trolley, and should be connected to water mains. It has a lockable stainless steel cover.

Meet our staff

Cubic, has been with Monitor for almost nine months. He assists in the workshop, particularly in the assembling of safety showers. Always cheerful and eager to please, he fits in well with our staff.

"The more we extend our knowledge, the more we become aware of it's limits"

Versatile, durable and affordable high pressure cleaning solutions

Electrically Heated Hot Water High Pressure Cleaner

An electric hot water unit is available on request from Hawk. It makes use of electric elements to heat the water up to 65°C which then passes through the Hawk high pressure pump. The system is ideal for applications where hot water is required, but traditional diesel fired burners are not possible, like the food processing industry.

Features

- ! Header tank with float valve and low level cut out.
- ! Inlet filter.
- ! On/off control for hot or cold water operation.
- ! Piston pump with ceramic plungers and brass head.
- ! Unloader valve for pressure regulation.
- ! Stainless steel chassis and covers with floor mounting holes.

Model	Max Volume	Max Pressure	Max Temperature	kW
EH15/150	15 l/min	150 bar	65°C	35
EH15/200	15 l/min	200 bar	65°C	35

Affordable Power

The Hawk high pressure cleaner range is capable of delivering pressures up to 300 bar and volumes up to 40 litres per minute. This makes them extremely versatile in their application. By simply adding accessories you can convert your machine into a roof cleaner, sandblaster, drain cleaner or tank cleaner. At the heart of the system is the Hawk piston pump. Hawk high pressure pumps have proved themselves around the world. They are reliable, easy to use, easy to repair, and inexpensive. The plungers are ceramic and seals are self-lubricating.

Unique Guarantee

Precision engineering and the use of high quality materials have enabled Hawk in South Africa to give a comprehensive Guarantee to cover their products. A full one year's warranty covers the workmanship and materials against defects, while they are also covered by a unique spares guarantee.

Should the required Hawk pump or accessory spare part not be available within 24 hours because of a out-of-stock situation, they will be airfreighted from the factory, and fitted, free of charge.
