Issue 81 - June/ July 2005

Hawk Clean and Coat is a division of  **MONITOR**

Dual-Pump High Pressure Washers

We were asked to supply a batch of high pressure cleaners, each with two pumps, header tanks and hose reels for 120m of hose. It took a bit of juggling to make it all fit, but the end result was quite impressive.

Fire Fighting Unit

Being winter, the need for fire-fighting units is greater than during the rest of the year. This unit (shown here without the 500 litre tank) is driven by either petrol or diesel engines. Foaming nozzles can be incorporated.

Hawk's new degreasing solvent.

A new non-toxic, citrus based, solvent has been introduced by Hawk. When it dries there is no residual film on the surface. It degreases rapidly and effectively and can be used for a wide range of cleaning applications. It is available in 400ml cans, so don't forget to ask our salesmen about this great new product.

Versatile, durable and affordable high pressure cleaning solutions

**15l/min
200 bar
85°C**

Electrically Heated Hot Water High Pressure Cleaner

This Hawk electric hot water unit makes use of electric elements to heat the water up to 80°C. Water passes through the Hawk high pressure pump and gets heated at high pressure. The system is ideal for applications where very hot water is required, but traditional diesel fired burners are not possible, like in the food processing industry. The machine pictured delivers 15 l/min at 200 bar at 85°C.

Features

- Header tank with float valve and low level cut out.
- Inlet filter.
- On/off control for hot or cold water operation.
- Piston pump with ceramic plungers and brass head.
- Unloader valve for pressure regulation.
- Stainless steel chassis and covers with floor mounting holes.
- 10m High pressure hose, gun and lance

Model	Max Volume	Max Pressure	Max Temperature	Amps per Phase
5H-HOTBOX-E2	13l/min	200 bar	85°C	65A

Affordable Power

The Hawk high pressure cleaner range is capable of delivering pressures up to 300 bar and volumes up to 40 litres per minute. This makes them extremely versatile in their application. By simply adding accessories you can convert your machine into a roof cleaner, sandblaster, drain cleaner or tank cleaner. At the heart of the system is the Hawk piston pump. Hawk high pressure pumps have proved themselves around the world. They are reliable, easy to use, easy to repair, and inexpensive. The plungers are ceramic and seals are self-lubricating.

Unique Guarantee

Precision engineering and the use of high quality materials have enabled Hawk in South Africa to give a comprehensive Guarantee to cover their products. A full one year's warranty covers the workmanship and materials against defects, while they are also covered by a unique spares guarantee. Should the required Hawk pump or accessory spare part not be available within 24 hours because of a out-of-stock situation, they will be airfreighted from the factory, and fitted, free of charge.
