Issue 78 - March 2005

Hawk Clean and Coat is a division of  **MONITOR**

Our New Road marker

In an effort to improve the road marking machine, we have made a few modifications. The new machine now comes with a Hoffmann engine, the belt running inside the guard and two guns which allows you to draw two lines at a time. You do have an option of using one gun at a time. Also optional is a bead dispenser that can be fitted on for custom designs.

Back by Popular Demand Hawk Petrol Unit

This Hawk petrol unit is capable of giving pressure of 140bar at 12l/min. These units are useful for sites where there is no power supply available such as building sites. They are also ideal for on site roof cleaning.

Compact rotary vane pumps

The compact range of rotary vane pumps are the smallest series of positive displacement pumps. It is capable of high performances despite the small size. It is brass made with a stainless steel AISI 303 rotor. The pump is equipped with a built-in relief valve.

Meet our staff

Nomsa Dlamini the efficient lady that was in our stores now has been promoted to our creditors department. She handles the creditors invoicing, reconciling and queries. If you need any assistance, you can now speak to Nomsa and she will be able to help you.
