Issue 87 - April/May 2006

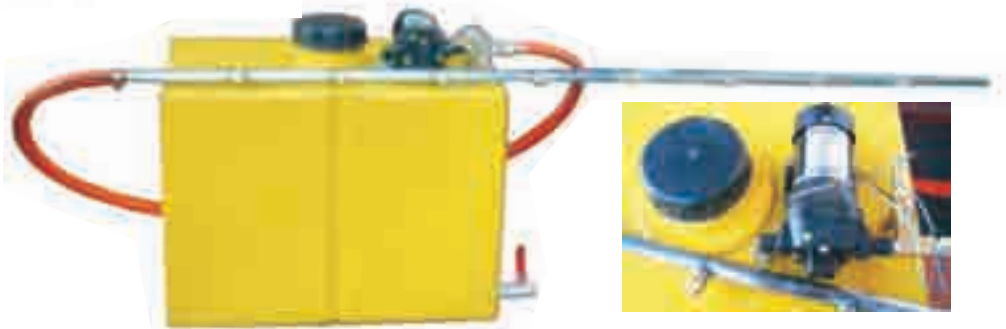

Hawk Clean and Coat is a division of **MONITOR** DISTRIBUTORS

EV Series

There is now a new large pump called EV series. It is perfect for industrial, heavy duty use. The two models are: 19l/min at 800 bar (900rpm) and 15l/min at 1000 bar (730rpm).

We are often asked to make special purpose spraying equipment. The item shown here is for spraying herbicide over the side of a bakkie and is powered by the truck's battery.

Tractor HP Cleaner

Last week we delivered two PTO driven, three point hitch, tractor mounted high pressure cleaners. Power is transmitted by means of a prop shaft from the PTO. This machine was originally designed years ago and works well.

A more recent development is our range of hydraulically powered pumps. They use the tractor's (or other hydraulic power pack) to drive the pump. The unit is very compact and the motor and pump can be held in one hand.

Meet our Staff

Melanie Peel has joined us as Marketing Manager. With her background and experience we are sure to improve our service to the customers.

Did you know?

We can now finance machines over the value of R5000.

"What the mind of man can conceive and believe, it can achieve"

Versatile, durable and affordable cleaning and coating solutions

HIGH PRESSURE CLEANING SOLUTIONS

Large range

The Hawk high pressure cleaner range is capable of delivering pressures up to 400 bar and volumes up to 40 l/min. This makes them extremely versatile in their application. By simply adding accessories you can convert your machine into a roof cleaner, sandblaster, drain cleaner or tank cleaner.

Unique lifetime spares guarantee

In addition to the factory guarantee, Hawk will fit spares free of charge if you have to wait more than 24 hours because of an out-of-stock situation.

Hot Box

An exciting new design has been used for the locally manufactured high pressure water heater. Connected to a normal cold water high pressure cleaner unit, the hot box provides high pressure hot water to remove heavy grease and dirt.

Custom Design

Hawk can custom design units to suite your particular requirements. Units up to 1200 bar and fixed installations can be built to order.

- Pressures up to 500bar
- Petrol, diesel or electric
- Built in South Africa
- Unique 24hr spares guarantee
- 25 Years of experience

AIRLESS SPRAYPAINTING SOLUTIONS

- Tips up to 0.052"
- Petrol, diesel or electric
- Built in South Africa
- Spray 600m² per day

Versatile and cost effective

Hawk airless spray painting machines are a versatile, durable and cost effective way of applying just about any material in just about situation, without the need for compressed air. They are perfect for coating large areas quickly and quietly while giving excellent coverage, with the minimum of over spray, saving both time and money. Cover up to 600m² per day.

Road / line marker

The Hawk PRM is perfect for marking roads, sports fields, garages, schools, parking lots or factories.

Large range

Petrol and 220 volt electric versions are available and both are supplied ready-to-run on a corrosion resistant stainless steel chassis. The unit includes 10m of high pressure hose, airless gun, tip and suction system.
