Diesel Fired, Electric Hot Water Unit

This new high pressure cleaner in the Hawk range should prove popular where a static diesel fired hot water machine is required. It is a very simple unit and can be made lockable. Developed for a customer who does not have the power available for an electrically heated machine, it has been seen by several other people who have expressed great interest. To fill the diesel tank, the lid has to be opened. This feature allows control of diesel usage.

Three Pump Unit

This triple-pump unit was designed for a customer who has a problem with water delivery to the header tank. Having a 200 Liter tank allows the pumps to run longer before the low-water-level cutout switch shuts down the pumps.

A carwash unit designed to fit a customer's pump room and to allow for easy servicing of the pumps.

Meet our staff

Jonas is the newest member of our team and originally comes from the DRC. Whilst working at Monitor Distributors as a stores clerk, he is studying part time towards his degree in Civil Engineering.

We previously sponsored his brother Joseph, enabling him to complete his degree in Chemical Engineering.

Broad Based Black Economic Empowerment Approved

We view the BBBEE policy to be important for the growth and development of our country. As such we have recently undergone an evaluation in order to receive our BBBEE status. Our accreditation agency will be issuing the certificate to us on Friday, 8th June 2007.

Seek the wisdom of the ages, but look at the world through the eyes of a child.
