Drain Cleaning Trailer Unit

The Hawk 80-250 trailer sewer cleaning machine shown is the latest in a growing range of these machines. Delivering 80 l/min at up to 280 bar pressure, the Hawk HFR80/280 pump is ideal for this size of cleaner. With a forward and reverse rotating, hydraulically powered hose reel it is easy to use. The trailer is balanced for easy towing and the 500 lit breaker tank safeguards the pump.

This is the first of seven machines headed for Africa.

30:1 Airless Pump

The new Hawk air operated airless paint machines are perfect for painting a wide range of coatings from varnish lacquers to emulsion paints. They are suitable for projects such as factory production, bridges, road etc because of their high efficiency. The best news is the price.

Pressure rate:	30:1
Max pressure:	180bar
Max. tip size:	0.021"
Paint Delivery / fluid flow:	8.4L/min
Compressed air input pressure:	3-6bar
Air cylinder diameter:	200mm
Stroke:	100mm
Delivery/cycle:	about 80ml
Max strokes per min.	100 cycles .
Spraying distance:	350-400mm
Gross weight:	85Kgs

Meet our staff

"Ebony & Ivory"

Congratulations to Devi Reddy and Malinda Pote on celebrating their 25 year service with Monitor Distributors.

Devi handles the reception and debtors and the first voice you will hear when you call us. She is always willing to help and goes the extra mile to ensure fast and efficient service.

Malinda joined the company as a debtors clerk. Through hard work and dedication she has earned the position of financial manager.

REMEMBER WHEN YOU'RE DEEP IN IT, LOOK STRAIGHT AHEAD, KEEP YOUR MOUTH SHUT, AND SAY NOTHING.

"The creative thinker sees the invisible, feels the intangible and achieves the impossible"
