clean and coat news

Issue 117, November / December 2011

Did you know?

What is more important Pressure or Volume?

When choosing a pressure washer for an application, both the pressure and volume of the machine are important. Whilst the pressure is very important, it is the volume which gives the weight to the punch. One liter of water weighs one kilogram. The more weight (for a constant pressure), the better the cleaning. Power, and this is the term used for "work done", is a combination of pressure and volume. Low volume at high pressure does little work.

New High Temperature NMT pump range

This range of pumps has seal packings designed for the food industry and all applications where water of up to 85°C is required. The pump must be fed at about 3 bar to prevent cavitation if high temperature water is used.

Anti-corrosion, nickel plated manifold provides protection from harsh environments.

All the spares are fully inter-changeable with the standard NMT pump range.

Hawk Petrol and Diesel Units

Hawk petrol and diesel units can now be fitted with gearboxes. Belts and pulleys will still be available. The advantages for both systems.

Belts have a natural shock absorbing property but require proper tensioning and alignment. They also absorb a substantial proportion of the engine's power and occupy more space.

Gearboxes connect the pump and engine mechanically, with no shock adsorption, but they require no alignment and are more efficient, absorbing less power and are more compact.

High speed pumps directly coupled do not last as long as slow revving pumps.

Hawk Gun and Lance Holsters

The new gun holsters enable the operator to conveniently store the gun and lance while the unit is not in use, protecting it from possible damage.

Most car and truck wash operators have, at some time experienced a vehicle driving over a gun and destroying it.

There are wall mount and floor mount versions available. Made of polished stainless steel to last longer, they also look good and professional.

Holiday Wishes

The management and staff at Hawk would like to wish you and your family the very best over the festive season.

Thank you for making this a prosperous year. We look forward to serving you in 2012.

Our Durban branch will be closed for our Christmas break from the 22nd December 2011 to the 3rd January 2012 and our Johannesburg branch will be closed from the 16th December 2011 to the 3rd January 2012.
