

Trailer with Foldable Spray Boom

A customer required a machine to spray a liquid onto dirt roads. Trucks travelling the route were causing big clouds of dust which was becoming a nuisance. A chemical company has designed a liquid which binds the dust to the substrate effectively creating a relatively dust free and stable road surface.

When the boom is opened it covers 6m and folds to 2m width.

The diaphragm pump was powered by a small engine.

Trailer to Pump Diesel

When new fuel pipelines are commissioned, what happens to the diesel in the old pipe?

Hawk has supplied a 160 l/min pump to transfer the diesel to the new pipe which has a 60 bar (+/-600m head).

The whole operation will take 10-11 days.

Custom Design Pedestal Eyewash Station

As always Hawk have supplied a batch of custom designed equipment. A customer operates in an area where water pressure can reach 10+ bar. This obviously affects the height of the eyewash spray.

To overcome this, a flow adjusting valve was fitted to the inlet and a gauge fitted to the feed pipe inside the pedestal.

A protector bracket was fitted to surround the gauge.

Trade Show

AVI Africa 2014 - 10th - 12th June 2014

Avi Africa represents the premier poultry event in Africa where exhibitors will be demonstrating their latest products and technology.

We will be exhibiting our products at stand numbers 148 & 149.

The show will take place at Emperors Palace, JHB.
