

2014 in Review: A Few Top Custom Designs

Another year has drawn to a close. It has been another tough year for South African businesses and globally. We are very fortunate and grateful that we've managed to stay strong in these tough times.

As is customary at this time of the year, we have looked back over 2014 to see what has worked for us and what hasn't. We strongly feel that our "can do" attitude together with the ability to custom design specialized equipment to 'solve' our customers problems, is what has given us the edge.

New VY Pump Series

A new range of high pressure pumps is available in the Hawk range. The latest 800 and 1000 bar pumps have been thoroughly tested for over a year with no problems recorded. Priced realistically, these pumps are winners.

Model	rpm	l/min	bar	Kw	Kg
VY-B 15/1000 R-L	1000	14.6	1000	27.6	58
VY-B 20/800 R-L	1000	20	800	30.1	58
VY-B 20/1000 R-L	1000	19.5	1000	36.8	58
VY-B 25/800 R-L	1000	24.5	800	36.9	58
VY-F 15/1000 R-L	1200	15	1000	28.3	58
VY-F 20/800 R-L	1200	20	800	30.1	58

Trailer with Foldable Spray Boom

A customer required a machine to spray a liquid onto dirt roads. Trucks travelling the route were causing big clouds of dust which was becoming a nuisance. A chemical company has designed a liquid which binds the dust to the substrate effectively creating a relatively dust free and stable road surface.

When the Boom is opened it covers 6m and folds to 2m width. The diaphragm pump was powered by a small engine.

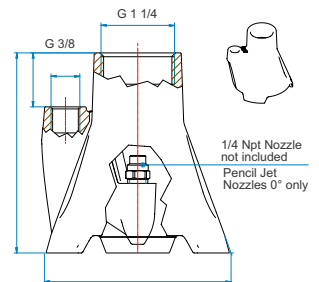

Trailer to Pump Diesel

When new fuel pipelines are commissioned, what happens to the diesel in the old pipe? Hawk has supplied a 160 l/min pump to transfer the diesel to the new pipe which has a 60 bar (+/-600m head). The whole operation will take 10-11 days.

Sludge Pump

Hawk have a new jet sludge pump which will soon be available. Fed with 15 l/min at 150 bar it will suck a 210 lt drum of water empty in about 30 seconds. Because it has no moving parts, it can handle solids of up to about 15 mm diameter. Sludge and sand are no problem.

Happy Holidays!!!

Both Durban and Johannesburg branches will be closing for the summer holidays from the 19th December to the 5th of January. For the week before the 19th and the week after the 5th there will be reduced workshop and sales staff who will be able to attend to customers' needs.

We wish all our clients a happy holiday and a prosperous New Year.
