Petrol Unit with Hose Reel on Steerable Trolley

A customer needed a trolley mounted drain cleaner that could be moved about the factory when required. It was required to be used as a surface cleaner.

The pump delivers 21 l/min @ 200bar and the hose reel carries 50m of hose.

Hawk Hose Reels

In addition to the 200bar high pressure reels that are popular, we are working on a new, live reel that can go up to 600bar. The reel can be mounted on walls, ceilings and on machine chassis.

The hose guides can be placed in seven different positions to suit their use.

New XXT Pumps

A great addition to the Hawk range of high pressure pumps, is the XXT7015 model. It delivers 71 l/min @ up to 150bar. This will be ideal for medium sized drain cleaning machines.

It does not replace the HFR80, which goes up to 280bar but it is about 40% of the cost of the HFR range.

Dust Suppression

At a conveyor transfer point for powders, a customer required something to stop the dust which billowed from the tank.

A circular spray boom, fitted with micro fine nozzles, produces a mist so fine that the dust is stopped immediately.
