

## New "Tsunami" Airless Spray Painting Unit

The new range of electrically powered diaphragm airless spray painting pumps operate with the pump in a horizontal position. This means that they can be fitted to a much wider range of trolleys.

The pump is able to utilise nozzles up to 0.043" and can be used with one or two guns (of up to 0.021" each).

## 600 Bar Nozzles and Swivels

New to our range of rotating nozzles is a 600 bar version which costs 38% less than the 500 bar one. All the new production of 500 bar machines will offer the 600 bar nozzle as an option. The sizes available range from 15 to 40 l/min.

The 600 bar (660bar maximum) 3/8" stainless steel swivel is suitable for use up to 60 l/min. This means that hose reels are now available for all of our 500 bar pump machines.

## Custom Designed Wall Mount Foamer

At last we have a wall mounted air-assisted foamer that has a gun at the end of the hose. The foam is thick and creamy and versions are available for using one or two chemicals with a selector valve.

There is also a version which has a rinsing hose for removing the residual soap in carwashes after rubbing with a cloth or sponge.

## Staff News

We would like to congratulate Karabo on her baby boy. We wish her all the best.

We also welcome Zillen who is helping out while Karabo enjoys motherhood.

Also joining our internal sales team in JHB is Edward. He comes with a vast amount of knowledge and experience which will be an asset to the company.
