cleaning and coating news

Issue 136, June 2015

Coin Operated Carwash Unit

Customers in the rural towns where there is a large minivan taxi population are installing coin operated high pressure cleaning machines with no frills.

The Hawk version, is a two pump unit with a header tank fitted with a low water-level cut-out switch.

The coin acceptor works on a R5.00 for 3 minutes basis as a self-service wash. Diluted soap is supplied in a bucket with a sponge.

Spray Boom for Bowling and Golf Greens

Chemicals have to be accurately applied to greens. The booms vary with applications and are usually custom designed. The chemicals are fed through a pump to the boom to ensure even spread.

A New Addition to the Hawk Pump Range

The new MXT pump range delivers from 70 to 100 l/min at up to 150 bar. The pump operates at 1450 rpm which allows for the use of a standard 4-pole motor.

It also means that a petrol/diesel powered drain cleaner can be built using a relatively low belt and pulley ratio.

AVI Africa 23-25 June 2015

Avi Africa represents the premier poultry event in Africa where exhibitors will be demonstrating their latest products and technology.

We will be exhibiting our products at stand numbers 19 and 20.

The show will take place at Emperors Palace, JHB.
