

With another incredibly busy and productive year having come to a close, we would like to thank our customers for their support and loyalty.

Important Dates for 2016

We have a busy calendar with regards to trade shows this year:

- **Nampo Harvest Day:** 17 - 20 May 2016
Nampo Park, Bothaville, Free State
- **Avi-Africa:** 21 - 23 June 2016
Emperors Palace, Kempton Park, Gauteng
- **Plumbdrain Africa:** 17 - 20 August 2016
Expo Centre @ Nasrec, Johannesburg, Gauteng
- **Electra-Mining Africa:** 12 - 16 September 2016
Expo Centre @ Nasrec, Johannesburg, Gauteng

Humidification Installation in Warehouse

We were commissioned to install a misting system in a 3500m² warehouse. The warehouse stores polystyrene containers. The system was required to increase humidity in order to remove static from the air, thereby reducing the risk of fire.

The misting pump has an output of 25l/min at 50bar. The unit incorporates a control which is used to manage the humidity levels.

The system has 560 nozzles. There are 7 lines - each line has 39 nozzle attachments with 2 nozzles per attachment. Each line has a valve which enables them to be individually closed for maintenance.

If you would like to receive our newsletters as an emailed PDF instead of a printed version, please contact Pam on:

You will need to provide us with your postal address so that we can remove it from our database, as well as an email address.

Petrol Pressure Washer Trailer - 18l/min @ 200bar

Our customer required a trailer-mounted high pressure cleaner that could be used for general cleaning purposes, as well as for drain cleaning.

We manufactured an 18hp petrol operated unit with an output of 30l/min at 200bar. A red 500L tank was used to tie in with the customer's corporate colours.

At the back of the trailer, 2 live hose reels were fitted. One hose reel had 30m high pressure hose, a gun, lance and standard nozzle. It was fitted with a gun holster. The other hose reel had 50m of high pressure hose and a drain cleaning nozzle. By using the selector (3-way valve) situated between the 2 hose reels, the operator is able to choose between the reels, depending on the application.

Staff Corner

A big "Thank You!" to Nomsa and Robby for being part of the Hawk team for the past 25 years.

Nomsa is a creditors clerk in our accounts department.

Robbie is our most experienced welder.

I'm not a bird expert but I believe there are four females and one male.
